

Installing ZoomyPOS on Your Phone

ZoomyPOS works like a regular app on your phone — no App Store needed. Just follow the steps below for your device.

Note: *You only need WiFi the first time you open it. After that, it works even without internet.*

On Google Chrome

1. Open **Google Chrome** on your phone
 2. Go to: **zoomy-pos.vercel.app**
 3. Wait for the page to fully load
 4. Tap the **Share button** beside the URL
 5. Tap "**View More**"
 6. Tap "**Add to Home Screen**"
 7. The app will appear on your home screen — open it from there from now on
-

On Safari

1. Open **Safari** on your iPhone
 2. Go to: **zoomy-pos.vercel.app**
 3. Wait for the page to fully load
 4. Tap the **three dots** () beside the URL
 5. Tap "**Share**"
 6. Tap "**View More**"
 7. Tap "**Add to Home Screen**"
 8. The app will appear on your home screen — open it from there from now on
-

Tips

- **First time only:** Open the app and leave it on the main screen for a few seconds while connected to WiFi. This lets it download everything it needs to work offline.
- **No internet after that:** Once set up, the app works without WiFi or mobile data.
- **Your data is saved on your phone** — transactions and products are stored locally and won't disappear if you close the app.
- **To update the app:** If you're told a new version is available, simply open the app while connected to WiFi and it will update automatically.
